

SEE THE FUTURE IN TRENCHLESS

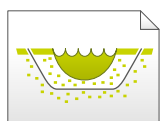

future-proof
SOLUTIONS

At **Future-Proof Solutions**, we're focused on the engineering and delivery of trenchless projects. Our range of products and services, combined with cutting edge technology, project experience, and our network of industry specialists, allow us to look ahead, formulate, and deliver optimal trenchless outcomes. We're a responsive, motivated, and innovative team with the front line experience and back-of-house capability to future-proof your solution. **We see the future in trenchless.**

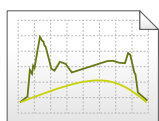

PRODUCTS

Our qualified team creates industry-leading pipeline designs, engineering solutions, and documentation that meets the most stringent practices and standards. Combining established techniques with innovative thinking, we specialise in the following:

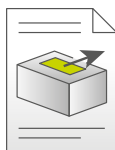

- ✓ Tailored feasibility reports
- ✓ Design and engineering for trenchless solutions
- ✓ Comprehensive site layouts
- ✓ Trenchless tools and supporting equipment design.

EXECUTION SUMMARY

We're HDD specialists who focus on design and delivery of trenchless projects, large and small.

We're resourced, versatile, experienced, qualified, certified and insured for Professional Indemnity, Public and Products Liability and WorkCover.

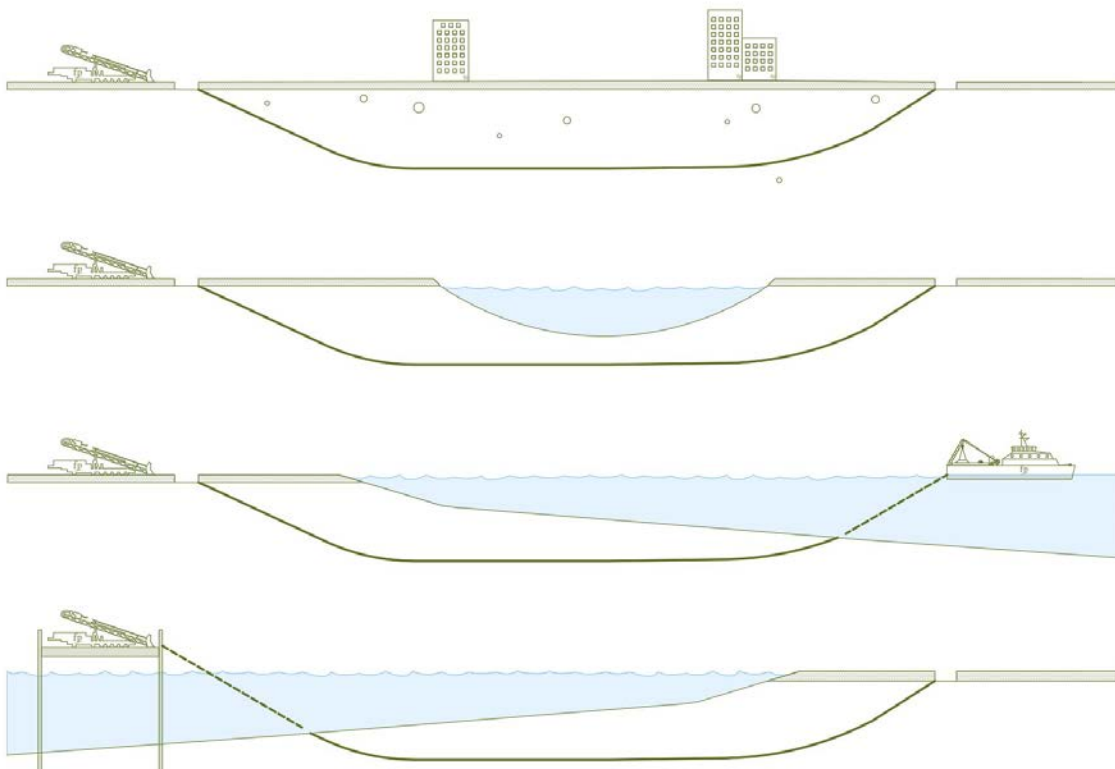

SERVICES

We strive to guide every client toward lasting positive outcomes via the most practical, simple, and low impact solutions. To do so, we provide services including consultation, optimisation, and best practice guidance on the following:

- ✔ Trenchless design and engineering
- ✔ Effective drilling practices and methodologies
- ✔ Fit-for-purpose tooling and site assessment
- ✔ Pipeline constructability evaluation
- ✔ Permit and approval requirements and processes
- ✔ Design, OHS and environmental feasibility risk mitigation.

PROJECTS

Future-Proof Solutions assists our clients toward positive project outcomes both domestically and throughout the world. For information on our current and completed projects, visit our website at: www.futureproofsolutions.com.au

NETWORK

With nearly 20 years' combined experience in trenchless and pipeline projects, and decades more in project management, we've got to know who to work with to get positive results.

We've developed a wide and trusted network of the world's pipeline specialists in industries including mechanical fabrication, civil construction, offshore services, and equipment logistics.

These positive relationships minimise supply chain risk, maximise capability, and allow us to provide end-to-end solutions. Our network becomes your network.
